## RUMENFORTE CAPSULES

Product Code #2031

**RUMENFORTE** capsules are a concentrated nutritional supplement, in an easy-to-use, Number 10 gelatin capsule. It contains essential vitamins and trace minerals, plus bacterial strains, yeast cultures, enzymes and active dry yeast, all of which help to:

- I. Restore metabolic processes when cattle are off-feed due to stresses such as:
  - a. Diet Change
  - b. Parasitism
  - c. Drug Therapy
  - d. Convalescence
  
- II. Precondition animals for:
  - a. Changes in feeding programs
  - b. Freshening (before and after)

During an extensive period of field testing, **RUMENFORTE** capsules proved its benefits to a number of large dairymen in California and Arizona. Some typical comments:

“When a cow goes off-feed or is down from rumen disorders, we administer **RUMENFORTE** capsules. Recovery results are excellent.”

“I use **RUMENFORTE** capsules whenever bringing in replacement heifers. My animals come into full feed much faster.”

“All of our sick cows receive **RUMENFORTE** capsules daily, both in the morning and in the afternoon. Those capsules sure get our cows back on feed in a hurry.”

**RUMENFORTE** capsules are a valuable complement to well-balanced feeding programs. Because they are concentrated, the normal recommended dosage per animal is only 2 to 4 capsules per day for a period of 3 or more days. They are easily administered by balling gun, or the contents can be sprinkled on feed.
