# BULLETIN

**DOG FORTÉ™** is an extremely palatable high-protein, high-energy supplement that also includes generous levels of vitamins, minerals, electrolytes and beneficial bacteria.

Because it is extremely palatable, **DOG FORTÉ** is an excellent attractant, helping to promote water consumption in animals that might otherwise be too nervous, sick or too tired to drink. It was originally designed for working and sports dogs just before or after a workout, to provide a nutrient boost and to stimulate hydration. These same features benefit sick and convalescent animals.

**DOG FORTÉ** is versatile and convenient. The dry powder is mixed at 1 to 3 ounces per pint of water like a sports drink or gravy, or it can also be sprinkled directly onto wet or dry food.

Every ingredient has been selected for maximum digestibility and palatability. There's no added filler and no indigestible fractions. **DOG FORTÉ** is all food: (See tag on page 2).

- ✓ The protein and protein digests are 94% to 98% digestible. These concentrated proteins provide rapidly available amino acids and peptides.
- ✓ **DOG FORTÉ** is very low in ash.
- ✓ The specific sources of carbohydrates and fats provide both quick and sustained energy. A portion of **DOG FORTÉ's** completely digestible carbohydrates provides immediate energy, with no indigestible bulk. The fat supplies more slowly utilized, but also entirely digestible, sources of energy and omega-3 fatty acids.
- ✓ Potassium and sodium electrolytes are balanced specifically for canine requirements, and help to replace those critical elements lost during exercise.
- ✓ **DOG FORTÉ** is fortified with fat-soluble and water-soluble vitamins, with extra attention given to those most crucial for anti-oxidant and anti-stress activity (vitamins C and E).
- ✓ The trace minerals are selected from sulfate and proteinate sources, providing better absorption than the widely-used (and less available) oxide forms.
- ✓ Beneficial bacteria and brewer's yeast are added to help maintain normal gut microflora that improve digestion and aid in minimizing excess gas.

**DOG FORTÉ** is formulated and manufactured by Dawe's Laboratories: the most experienced specialist in worldwide animal nutrition. Only the highest quality nutrients are used in **DOG FORTÉ**, and only at levels and in ratios right for the task. There's no gimmick in **DOG FORTÉ**, just good solid nutrition.
